Krupakar S Bilichod

Final-year Cyber Security student | Security Analyst (L1) and Consultant roles

krupakarsb@gmail.com | linkedin.com/in/krupakarsb | github.com/krupakarsb | krupakarsb.github.io

Summary

Final-year B.Tech Cyber Security student with hands-on project work in security tooling, audit logging and digital forensics. Looking for internships and graduate roles as a Security Analyst (L1) or Cyber Security Consultant, available from 2027.

Education

B.Tech, Cyber Security, GM University, Davangere — Expected 2027

Projects

zlang: a language and console for security work — Personal project, 2026

Designed and directed by me, built with AI-assisted development in Python and Flask. krupakarsb.github.io

- A security programming language with a lexer, parser and interpreter, functions, modules, 55 commands, pipelines, scripts and variables, wrapping tools such as nmap behind one syntax.
- A scope check refuses any network command whose target is not on an approved list, and every command is logged.
- A local web dashboard with bcrypt sign-in, account lockout, CSRF protection and role-based access.
- A hash-chained activity log that detects edited or removed entries, with PDF, Markdown, CSV and JSON reports and 6-hourly batches pushed to GitHub.
- Over 300 automated tests covering sign-in, roles, terminal limits, tampering and exports.

Hasfragis: cryptographically verified digital forensics — Team project, final year

- A toolkit that makes evidence tamper-evident and checkable, as a member of the project team.
- Seals evidence with SHA-256 hashes and a Merkle root, records handovers in a signed custody ledger, and builds an incident timeline.

Skills

Computer networking, Linux, Python, Git, cyber security fundamentals. Project tools: nmap, Flask, SQLite.

CTFs and labs

Ascent: Override.exe CTF, Scaler School of Technology	May 2026
Advent of Cyber 2025, TryHackMe	Dec 2025

Courses and certificates

AWS Cloud Practitioner CLF-C02 course, Udemy	Feb 2026
Vulnerability Assessment and Penetration Testing, industry-integrated program, GM University	Jul 2025
Networking Fundamentals on Google Cloud, Google Cloud Skills Boost	Sep 2024
Foundations of Cybersecurity, Google	Mar 2024
